

Kistler MSW Sensors

Universal Measurement Steering Wheels

For non-contact measurement of steering moment, steering angle and steering speed.

- Non-contact, optical steering angle sensor
- 50 N·m version for passenger cars; 250 N·m version for utility vehicles
- Reduced size
- Increased dynamics
- Preservation of airbag function
- Fast and easy installation

Description

Kistler MSW sensors are specifically designed to be used with modern steering wheels of passenger cars and utility vehicles.

The introduction of new driving assistance systems calls for testing equipment that performs even better. Kistler MSW sensors meet the growing demands of modern automotive engineering perfectly. Reduced in size and weight, they offer higher dynamics and increased resolution without impairing steering wheel functions (airbag) and control elements. For optimum safety, the sensors have a high breaking moment.

Kistler MSW sensors may be mounted in two different ways: normally the sensor is installed between the steering wheel and the steering shaft. To permit universal application, the sensors may be equipped quickly and easily with an interchangeable adapter to connect to the steering shaft gearing. An optional steering angle stop improves the performance of special driving maneuvers.

Kistler MSW sensors are equipped with a switch-key to reset the steering moment and angle. The offset is stored and still available after voltage loss or restart. Via CAN bus, outputs can be set to zero at any point. Calibration data are stored in the sensor element, enabling the user to exchange sensor elements, if required.

Application

Universal measurement steering wheel for measurement of steering moment, steering angle and steering speed; for vehicle driving dynamics tests like ISO 4138, steady-state circular course drive.

Technical Data

Performance Specifications

Power supply	V	10 28
Power consumption at 12 V	W	<20
Adjustable filter time	ms	2 512
		(or unfiltered)
Data-update rate	Hz	1 000
Temperature ranges		
Nominal temperature range	°C	0 70
Operating temperature range	°C	-20 80
Degree of protection		
Sensor (cable mounted)		IP40
Electronics (cable mounted)		IP40
Mass moment of inertia	kg·cm²	80
Weight (without steering wheel and		
electronics)		
Passenger car version ¹⁾	kg	2,7
Commercial vehicle version ¹⁾	kg	2,8

Steering Moment

Measurement range			
Passenger car		N∙m	±50
Commercial vehicle		N∙m	±250
Overload			
Passenger car	torque	N∙m	±100
	bending moment	N∙m	±150
Commercial vehicle	torque	N∙m	±500
	bending moment	N∙m	±750

Technical Data (Continuation)

Accuracy	%FSO	±0,15
Linearity deviation	%FSO	±0,15
Temperature influence		
On the zero signal	%FSO/10K	0,5
On the index value	%FSO/10K	0,5
Zero-point stability (above 24 h)	%FSO	0,05

Steering Angle

Measurement range (absolute principle)	0	≥±1 250
Steering speed	°/s	≤2 000
Resolution	0	0,015
Accuracy	0	±0,1

Steering Wheel Adaptation

Dimensions of Sensor

Diameter of the hollow shaft	ø mm	75
Max. height of the measuring body	mm	33
Pitch circle for screw-on threads	ø mm	90
(M4/16 pcs)		

Signal Outputs 2)

<u> </u>			
Ana	log outputs		
	DA converter resolution	Bit	16
	Non-linearity	LSB	±16
	Steering moment M1 (±50/250 N·m) 3)	V	–10 10
	Steering moment M2 (±10/50 N·m) ³⁾	V	–10 10
	Steering angle L1 (\pm 1 250 °) ³⁾	V	–10 10
	Steering angle L2 (±200 °) 3)	V	–10 10
	Steering speed (±1 000 °/s) 3)	V	–10 10
Dig	ital outputs		
	Steering moment TTL		ja
	Steering angle TTL		ja
	Steering speed TTL 0 °	pulses/rev	20 000
	Steering speed TTL 90 °	pulses/rev	20 000

Interfaces CAN (Motorola/Intel) 2.0B USB (Full Speed) 1.1 Ethernet yes

¹⁾ with standard steering wheel flange, without steering wheel and steering shaft adapter

²⁾ all outputs are protected against overvoltage and short-circuit

³⁾ standard settings; can be individually adjusted via KiCenter

Steering Angle Stop (optional)

Fig. 4: Steering angle stop for Kistler MSW sensors

Features of the Steering Angle Stop

- Fixes the steering angle to a pin point
- Enables steering movement between two different steering angles
- Easy handling
- Use of existing steering shaft adapters is possible
- Unrivaled mechanical setup (size and height)

Typical Applications

- Sudden steering input
- Sinus steering
- Zero-point determination
